TECHNICAL SKILLS

- **Four+ Years:** Python, HTML, CSS, Bootstrap, WordPress.
- **Two+ Years:** REST API, JavaScript, Linux / Command Line, Git, Sketch, Jira/Confluence, WPML, Gravity Forms, Salesforce.
- **Greater than one year:** Swift 3.0, PHP, SQLite, XML, Basecamp, Django (python).

The above list contains the different programming languages & enterprise software I am familiar with ordered by the amount of experience I have with each

EXPERIENCE

Dealer Inspire, Naperville, IL - WordPress Developer

OCTOBER 2018 - Present

- Create responsive web pages with custom content, utilizing various languages such as HTML, CSS, JS, JSON & PHP.
- Adhere to responsive design principles and compliance requirements.
- Demonstrated ability to plan, scope, and deliver projects with minimal impact to Dealer Inspire and Auto Group operations.
- Maintain, create & update Gravity Forms to interface with client's CRM.
- Implement third party tools onto websites, while documenting and reporting bugs to the client & third party.
- Helping to maintain documentation for best practices and procedures for our, as well as, 3rd party tools that were implemented through the DealerInspire platform.
- Create apps, using Python that currently aids in automating consistent tasks, documentation, and bulk page migrations for larger clients.

EDUCATION

Indiana University, Bloomington, IN - B.S. Informatics

AUGUST 2013 - MAY 2017

While at IU I majored in Informatics with a focus in security, and minored in Business and Marketing. I studied a number of different topics that ranged from semesters of programming and business management courses, to developing apps or preparing case studies for major companies.
